

6<sup>th</sup> November 2013      Friday    – SALT of the Earth Meeting  
Spandau School      Berlin      09:00 to 12:00

Friday 6<sup>th</sup> December

Agenda Items:

09:00 - Please be ready to start at 9am.

**1. Organisation for the Christmas market : decoration, leaflets, posters, music, items, prices.**

All plans / posters / costings / timetables in place.

**2. Timetable for the market on Saturday. How will the pupils be organised to be involved?**

Completed.

**3. Thinking about gathering our big resource of made items, etc, at the end of the project. How are we progressing? Look at the website and see how clear everything is.**

Because of staffing problems in the school we were unable to access the technology room. Each country is asked to do this from their own school. Is all of your content there?

**4. Any items remaining from yesterday and a final check on the new project plans.**

**Romania's Salt Map – content is still needed from some countries.**

Could everyone please send to Eva a map of their country's salt mines, etc. Perhaps it would help if Eva gave us a list of the countries still needing to send content.

**Etwinning and forming links.**

Video conferencing – linking via skype / etwinning, etc

A good discussion took place on how to use ICT to link countries. It was decided that all countries should find a partner to link with via ICT. This could be on skype / etwinning / video conferencing. A link should be made before the Poland meeting so that we can discuss how useful this type of linking is and how we could include it in our future plans.

**The Photo competition**

Salt Photographic Competition

All countries to encourage their pupils to take pictures with a theme of Salt. It is open to creative ideas.

**Bring 3 A4 winners from each country to Poland.**

**(All countries to give 10 Euros to support the buying of a few prizes. Prizes will be bought by the colleagues from the winning countries when they get home to save on luggage space. Same for the photo competition.)**

**Evaluation – timing the final part**

**Ali would like all of the evaluation to be with him by 1<sup>st</sup> May. After this he will publish the results and also give us a presentation in Poland about the findings.**

**Results of our first round of evaluation has already been presented at an International conference in Krakow. It has also been added to a science text book.**

**Website content**

**All countries to check the content of the website to see if there is anything from their outcomes that has been missed.**

**Mr and Mrs Salt Pots competition winners – this was missed. Could we move the result to Poland?**

**We forgot about this – did everyone send in their pictures to Ulla?**

**Thank you to everyone for their contribution to the meetings. It has not been possible to name everyone and to list every suggestion, but the meetings were prompt, well attended and carried out in good order – thank you from - Lesley ☺**

**Also - please see my reminder timetable to keep all of the above in mind as a checklist.**
