

# SALT OF THE EARTH

## S.A.L.T.

Science - Arts - Language - Technology

### Activities from the first year of the programme

We got to know what this programme is all about and we gathered our project team.

Our team set up a „Comenius corner” and we have continuously updated it during the project.

We wrote mini-essays about salt.

We completed the preliminary survey and we analysed the results.

We made postcards and we sent them to the partnerschools.

We organized an exhibition from the postcards that we received.

We studied the history of salt. We prepared a presentation with the title „Salt in the past and today” and we watched it than together.

We investigated why our body needs salt. We watched a presentation about the physiological effects of the salt.

Using the material from our austrian partners we made experiments. A few of us wrote essays about the other participant countries. We presented these essays to the whole group.

The team researched about the salt mines of our country and the partner countrys on the internet and in the library as well as live - for a better understanding of the topic - participating on study visits.

During these trips we visited:

the salt mines in Izmir Halle and the salt mines located in Turda and Praid, Romania.

We also visited the so called „Salt District” of Transylvania.

We've created a lot of interesting things:

- using the material from our partner school from Greece we made flyers about the relation of salt and health,
- using the material from our partner school from Austria we prepared „What happens if...?” cards,
- using the material from our Spanish partner school we learned a lot about the role of salt in economy and we prepared „What happens in the wonderful world of salt?” cards,
- we drew a map in A4 format about the places that are related to salt production in Romania, we composed a Link collection about the topic,
- we prepared key-holders with „SALT” inscription using pearls; we also prepared different things of salt dough,
- we designed games using the material gathered during the first project year.

We organized a „SALT CELEBRATION”

with funny games and competitions based on what we learned in the first year.

We also collected tales and legends related to salt and the Salt District from Romania.

We presented theater plays on this topic and finally the winners and all participants received various prizes.

We  
learned  
a lot

and we also had a lot of joy in  
this  
first  
year

and we are looking forward  
to the  
sequel.
